

EXTERNAL SEMMinars

January 2018

IFOM-IEO Campus - h. 2:00 pm
 Conference Room (Building 9)
 Via Adamello, 16 - Milan

 CAMPUS SEMMinars
 Unusual time or location

date	speaker	title	host
 JAN. 08 @MR 1+2	Robert Kerbel Professor, Dept. of Medical Biophysics, University of Toronto (Canada)	Experimental therapeutics in preclinical mouse models of metastatic disease: lessons learned, discoveries made	Ugo Cavallaro
JAN. 12	Michele Mishto Centre for Inflammation Biology and Cancer Immunology (CIBCI) & Peter Gorer Department of Immunobiology, King's College London (UK)	Proteasome-catalyzed peptide splicing at the edge between self and non-self	Maria Rescigno
JAN. 15	Cedric Boeckx ICREA Research Professor, Barcelona University (Spain)	Genomic insights into the evolution of human cognition	Giuseppe Testa
 JAN. 18	Patrick Cramer Max Planck Institute for Biophysical Chemistry, Department of Molecular Biology, Göttingen (Germany)	Transcription of the genome: from initiation to regulation	Fabrizio d'Adda di Fagagna
 JAN. 25 @silver room	Fabrice Caudron Queen Mary University of London, UK	The collection of memories by protein aggregation in budding yeast and their decline during ageing	Andrea Ciliberto
JAN. 26	Matthias Merckenschlager Lymphocyte Development Group, MRC London Institute of Medical Sciences, London (UK)	Control of inducible gene expression links cohesin to hematopoietic progenitor self-renewal and differentiation	Bruno Amati
JAN. 29	Olivier De Wever Laboratory of Experimental Cancer Research, CRIG-Cancer Research Institute Ghent, Gent (Belgium)	Paracrine interactions in the tumor environment: soluble factors and extracellular vesicles	Angela Bachi
